

WALL STICKERS

INSTALLING YOUR WALL STICKERS

Prior to applying your wall stickers, please read this instruction sheet carefully.

- **If your wall has been recently painted, do NOT apply you wall stickers!** Please wait at least three weeks to let the paint dry completely.
- Please take extra care to avoid damaging your wall when removing stickers from painted walls. You may find it easier to remove them when a hairdryer is used which makes the adhesive softer. Using a sharp object, such as a needle or tweezers will further help your removal.
- Avoid bent or rough surface. Place them on the smooth and dust-free surface.

Lets Start. You will need dry cloth, plastic card or squeegee

STEP 1

Prior to the application, please make sure your wall is clean and dry. Wipe the surface with a dry cloth to ensure that it is free of dust or dirt.

STEP 2

Peel the wall sticker from the backing paper.

STEP 3

Stick the wall stickers slowly and firmly from the top to the bottom.

STEP 4

Ensure that the entire stickers make contact with the wall, and that no air bubbles are trapped beneath the sticker.
